

Kashmir Small Batch Private Label Program

Pre-Rolled Tubes

Private labeling is the most effective way to turn your dream products into reality. Creating a private label product can give you the same control over pricing, branding, and profitability without the headache and cost of building your own factory. It has become a very popular business model for both brick-and-mortar retailers as well as sellers on online marketplaces such as Amazon, eBay and more.

Kashmir is not only a premiere U.S.-made brand of rolling papers and pre-rolled tubes, but also a full service, turnkey contract manufacturer specializing in large-scale, custom private label products.

Now we're pleased to introduce the Kashmir Small Batch Private Label Program. This simple, cost-effective program features reasonable MOQs starting as low as 5,000 units, the highest quality paper and a simple menu of components designed to bring your boutique brand to life.

If you've always wanted to provide your customers with a custom-branded product without the high minimums or resorting to overseas manufacturing, the Kashmir Small Batch Private Label Program can turn your dream into reality.
